

# TOOTHPASTE PUTTY

## MATERIALS:

- ½ t. toothpaste (creamy, not gel)
- 1 t. white glue
- 2 t. cornstarch
- ½ t. water
- small dish

## PROCESS:

1. mix toothpaste, glue, and cornstarch in dish
2. mix with one finger
3. add water
4. mix until you have a lump of putty  
*hint:* putty should clean dish
5. wash and dry hands
6. squeeze and roll putty into ball  
*hint:* the more it's rolled, the better it gets
7. push, pull, roll and explore putty

## HINTS:

1. putty begins to dry in 20 minutes, so to soften it, use a drop of water
2. toothpaste putty will dry rock hard in 24 hours

dries rock hard in 24 hours
